

MA CARSTORE MAGENTO PACKAGE

Installation Guide

Thanks for purchasing this theme. These instructions will get you up and running in Magento quickly.

You can choose install quickstart package or only template:

I. Install Quickstart package:

This installation guide only applies for new installation.

Quickstart package = Latest Magento version + Full MA extensions + Sample database same like in live demo site.

Setup Instructions:

Step 1:

Create new database and import database sample (**ma_carstore.sql** or **ma_carstore.sql.gz**) in database folder.

Step 2:

Extract and Upload the whole Quickstart package (app, js, skin ... in **ma_carstore_quickstart** folder) to your server

Step 3:

Open browser and navigate to your site (where the quickstart uploaded) to load default Magento installer with the database you just created and import database sample.

Step 4:

Step by step to follow the instructions

Step 5: Finish installer

(Important note (at step 3 of installation - Configuration page))

II. Install template

www.plazathemes.com – support@plazathemes.com

for Magento 1.4.1.1, 1.4.2.x, 1.5.x.x, 1.6.x.x, 1.7.x.x

Setup Instructions:

Step 1:

Please unzip package (**ma_carstore_template.zip**) and upload the folder (app, skin) from the theme package to the root directory of your magento software using an FTP client.

Step 2:

Please go to Magento Admin >> System >> Configuration >> Design, write "**ma_carstore**" in Themes/Default input box and click "Save Config" button.

The screenshot shows the Magento Admin Configuration page, specifically the Design section. On the left is a sidebar with a 'Configuration' menu. The 'Design' section is selected, and the 'Themes' sub-section is active. The main content area shows a table with columns for 'Package' and 'Themes'. The 'Themes' column contains input fields for various packages, with 'ma_carstore' entered in the 'Default' package's field. There are also 'Add Exception' buttons for each package.

Package	Themes
Translations	[STORE VIEW]
Templates	[STORE VIEW]
	[STORE VIEW]
Skin (Images / CSS)	[STORE VIEW]
Layout	[STORE VIEW]
Default	ma_carstore [STORE VIEW]

Step 3:

Clear the store cache under Magento Admin >> System >> Cache Management and all cookies for your store domain. It might be necessary in case something goes wrong.

Step 4:

www.plazathemes.com – support@plazathemes.com

Create CMS pages and CMS static blocks in Magento backend. Copy/paste from source files inside in **content** folder:

/content/cms page/

/content/Static block/

Step5: Install extensions and configuration

Please unzip package and upload the folder extensions (app, skin, js) in **ma_carstore_extensions.zip** file) from the theme package to the root directory of your magento software using an FTP client.

You go to admin => System => Configuration => Select module you need config in the MAGENTOTHEM tab in left side bar.

Configuration extensions like file inside "**extensions configuration**" folder.

Step6: Choose theme color and main menu style

Please go to Magento Admin >> System >> Configuration >> Magentothem >> Theme Options tab then choose theme color, menu style and click "Save Config" button

Theme Options

Theme Options Config		
Theme Color:	<input type="text" value="Black Red"/>	[STORE VIEW]
Menu Style:	<input type="text" value="Fish Menu"/>	[STORE VIEW]
Background Color:	<input type="text"/> ▲ Background color: ffffff	[STORE VIEW]
Background Image:	<input type="text"/> <input type="button" value="Browse..."/>	[STORE VIEW]
	<input type="checkbox"/> Delete Image	

All done!
